## SUMMARY

Full Stack Web educated at UT Austin. Effective at combining creativity and problem solving to develop user-friendly applications. Passionate about approaching programming challenges from different angles and collaborating with others to create meaningful web applications. Excited to develop responsive websites. Positioned to provide unique perspectives on how end users interact with websites and software platform known among staff for strong attention to detail no matter the complexity of the project.

## TECHNICAL SKILLS

**Languages: Html5, Css3, JavaScript, jQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS**

## PROJECTS

**| Burger Logger App** [https://github.com/chidibangzz/burgerLogger2]
- **User friendly app allowing smooth interaction between the user and the server. Allows the user to add any burger of their choice to the web page and then the allows user to devour the burger they created and then allows for disposal**
- Your core responsibilities in project (1-2 lines)
- responsible for connecting database to MySQL and Heroku. Created my front-end routes and connected it to my backend routes to initiate my Get and Post methods.
- Tools / languages used
- **jQuery, MySQL, Html, CSS, Node**

**| Covid Tracker App**
[https://github.com/brantleymorris/Covid_Hotel_Booking/blob/main/README.md]
- **Travel safe and luxurious with my hotel booking and Covid tracker app by searching the city you want to travel to**
- **Developed the interface design using html and CSS  and API implementation of searching Covid cases by county**
- Tools / languages used
- **jQuery, Html, CSS, Node**

**| Weather Dashboard** [https://github.com/chidibangzz/homework6/blob/master/README.md]
- **Search a city and find out the temperature, weather, UV Index and future forecast with a picture to match the weather type.**
- Responsible for API implementation and using ajax documentation to retrieve specific data that I needed for display.
- data Tools / languages used
- **jQuery, Html, CSS, Node**
- 

**| Budget App** [https://github.com/Portmeister/budgetApp]
- **Do you have a hard time keeping up with bills? Well keep yourself organized and store upcoming bills inside my budget app**

- Responsible for back-end development specifically matching up routes from the front end.
- data Tools / languages used
- **jQuery, Html, CSS, MySQL**

## EXPERIENCE

**University of Texas at Austin**
Full stack developer Internship
   01/2020 - 06/2020

- Developed app-solution using a variety of languages and framework and platforms such as SQL, JQUERY, html, CSS.
- Collaborated with a team of experts to design and develop a SAAS application.
- Worked closely to develop a web application design that fit the requirement of the project and company needs.
- Developed a ReactJS based application for inventory management. Created node services and stored data on MongoDB.
- Learned new front-end technologies and implemented them

## EDUCATION

**Bootcamp Certificate:** University of Texas, Austin ST
A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, jQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

**Certification:** Coding bootcamp Full-stack completion
